

# INTRODUCING MERLIN

“Merlin Software has been the software of choice for many of the world’s leading timeshare developers and our software solution for mature resorts is proving very popular. Both types of Merlin client receive cutting edge technology, a great customer experience – and no upgrade fees ever.”

## BIOGRAPHY

Established in 2005, Merlin Software provides the complete software as a service (SaaS) package for today’s timeshare resort operation – whatever the location, age and size of the development and the type of timeshare product sold.

With specific solutions for both active, in-sale resort developments and also for legacy resorts managed by their owners, Merlin’s comprehensive functionality supports every aspect of a resort operation – no other software is required.

Accessed over the Internet, without the need for expensive hardware or licenses, resorts just need a PC with an Internet connection, login and password to access Merlin’s cutting edge technology.

## SERVICES AVAILABLE

Merlin for Enterprise is able to handle the complex demands of today’s leading timeshare developments, while Merlin for HOA Resorts is an out-of-the-box solution for legacy resorts – and is license-free for those who qualify.

Functionality includes key areas such as:

- Sales and marketing
- Full accounting module
- Management fee billing and collection
- Property management system
- Front desk/reception
- Website integration
